

Enhancement Of Coating Quality and Excellent Performance. ...

Advantages:

EFFECTIVE RECOATING

To charge powder with a low current and a high voltage, makes it easier to do recoating without a separate control of voltage or current.

DECREASE IN ORANGE PEEL

Flexi Auto coating can significantly decrease orange peel, which is generally caused by a thick powder.

Efficient, solid reliability, light weight and economical range of powder coating gun

- PON-E India Flexi Auto powder coating is a great and repeatedly charges powder with a low current and a high voltage at intervals of short time
- Reduction in Coating Material Consumption

Technical Data

■ Input Voltage	: AC220V	■ Temperature Range	: -15°C~55°C
■ Frequency	: 50Hz	■ Length of Gun	: 300mm
■ Power Consumption	: 30W	■ Input Voltage	: eff. 12V
■ Voltage Output	: 100kV	■ Polarity	: Negative
■ Current Output	: 100μA	■ Max. Flow Capacity	: 600g/min
■ H-V Engagement Mode	: Inside of Gun	■ Programs	: 50 pre-defined
■ Air Consumption	: Max. 15Nm ³ /h	■ Weight of Gun	: 360g
