

Exclusive Touch Screen Control with "fuzzy logic"  
for easy operation and excellent Powder flow control.

## Advantages:

### EFFECTIVE RECOATING

To charge powder with a low current and a high voltage, makes it easier to do recoating without a separate control of voltage or current.

### DECREASE IN ORANGE PEEL

Flexi Auto coating can significantly decrease orange peel, which is generally caused by a thick powder.

## Efficient, solid reliability, light weight and economical range of powder coating gun

- PON-E India Flexi Series powder coating system is a great and repeatedly charges powder with a low current and high voltage at intervals of short time.
- Reduction in Coating Material Consumption and user friendly Touch panel

Technical Data			
■ Input Voltage	: AC220V	■ Temperature Range	: -15°C~55°C
■ Frequency	: 50Hz	■ Length of Gun	: 300mm
■ Power Consumption	: 30W	■ Input Voltage	: eff. 12V
■ Voltage Output	: 100kV	■ Polarity	: Negative
■ Current Output	: 100µA	■ Max. Flow Capacity	: 600g/min
■ H-V Engagement Mode	: Inside of Gun	■ Programs	: 50 pre-defined
■ Air Consumption	: Max. 15Nm <sup>3</sup> /h	■ Weight of Gun	: 360g
